Parents evening

Afterschool Clubs (places allocated):

- Dodgeball Y5/6 (3:30-4:15)

Fri 16th October:

Elm (Miss Cook), Birch (Miss Atkinson), Juniper (Miss Thubron)

Our **Fir** Class Co-operation Afternoon was a wonderful opportunity for children and their adults to work together and have fun! The children enjoyed a drawing game where they had to give clear instructions to their adult to draw an image without showing them what it was. This encouraged lots of listening, communication and teamwork. They then worked cooperatively to complete dot-to-dots and puzzles, supporting one another and sharing ideas along the way. It was lovely to see everyone enjoying the afternoon and developing their co-operation skills together.

Maple are thoroughly enjoying their first term back to Muddy Monsters! They have used great co-operation skills and determination to achieve with a range of activities including den building, fixing the fence, painting and creating their own games! All the children love the opportunity to explore our outdoor space, and Wednesday is a popular day of the week!

Over the past few weeks in Art, **Cedar** class have been developing our drawing and creative skills through a range of exciting activities. We began by exploring texture, creating rubbings from different surfaces and materials before carefully cutting and arranging them to produce beautiful flower collages. Using real flowers as inspiration, we then practised our observational drawing skills, looking closely at shape, detail and form to create accurate sketches. Most recently, we have combined the techniques and ideas from our previous lessons to create large-scale abstract drawings, experimenting with texture, line and composition to produce bold and expressive artwork. We are incredibly proud of the creativity, focus and artistic confidence shown by all the children.

Pine Class

This week in Pine Class, we have been carrying out a pattern-seeking investigation to answer the question: “Do taller people have a larger head circumference?” Children took measurements, recorded their results and looked carefully for patterns in the data. We developed our scientific enquiry skills by making predictions, measuring accurately and discussing what our results might tell us.
